Ongoing charge figure	0.42%
There will be an additional 0.25%pa charge (no VAT) if LGT Wealth Management are asked to act as custodian and a third party platform is not used.	

Portfolio description

This portfolio looks to achieve capital growth in excess of inflation, whilst supporting inclusive economic development by investing in more environmentally and socially sustainable business practices. The portfolio will look to do this by investing in a diversified range of funds, which allocate capital to sustainable themes, such as healthcare and social housing, financial inclusion and education, the circular economy and renewable energy. The portfolio is diversified across a range of asset classes with a medium allocation to funds investing in equities (expected to be no greater than 40%) and other risk assets. Target volatility: 2% - 4.75%

United Nations Sustainable Development Goals

Portfolio pillar mapping

As part of the LGT Wealth Management Sustainable Model Portfolio Service, we have developed four sustainable investment pillars. These pillars encompass investment themes and the related the United Nation's Sustainable Development Goals (UN SDG), which they aim to support. Two of the pillars target social themes and two target environmental themes. This allows the translation of a framework based on a global, wide-reaching social and environmental change into an investable universe of ideas.

Our sustainable investment pillars

In order to better understand the thematic exposure of the portfolios, we have aligned the underlying funds to our sustainable pillars.

Key

Healthcare and societal wellbeing	73%
Financial inclusion and education	3%
Circular economy and resources	10%
Climate and Environmental action	14%

Monthly investment update

August saw stronger-than-expected gains across markets. The S&P 500 rose nearly 2% for a fourth month in a row, while the equal-weighted index gained 2.7%, pointing to a broad rally beyond the largest technology stocks. Developed and emerging markets added to the advance, and bonds firmed as US Treasury yields eased. Earnings were better than forecast, led by technology and AI-linked firms. Hopes of a Federal Reserve rate cut in September lifted sentiment, with markets pricing an almost 90% chance. Yet inflation remains sticky, with core PCE rising to 2.9% year-on-year, and tariffs beginning to weigh on some industrial companies.

UK bond markets came under pressure, with the 10-year Gilt moving from 4.5% to 4.8% and the 30-year hitting 5.7% in early September, its highest since the late 1990s. The move reflects stubborn inflation, rising borrowing, and fiscal concerns. Overall, equities and bonds showed resilience in August, helped by earnings strength and hopes of looser monetary policy. While August bucked the trend with gains, historically, September has been the weakest month of the year for US stocks, but the balance of evidence still points to resilient markets.
