Investor profile

The Fund may be suitable for retail investors looking for long term capital growth through investment in a well diversified, professionally managed portfolio, with a level of exposure to equities that will aim that the portfolio is managed with a volatility of between 4% and 7%. As a result the client can reasonably expect to experience a reduced level of volatility to that of equity markets over the longer term. The client accepts the possibility of short term fluctuations in value in pursuit of higher long term returns and is prepared to invest for at least five years.

Investment update

Global equities made small gains in November after an early spike in volatility driven by shifting expectations for US rate cuts and fresh scrutiny of stretched technology valuations. Jerome Powell pushed back against assumptions of a December cut, prompting sharp swings, though markets steadied later. The S&P 500 ended flat, the Nasdaq fell 1.4% and the Magnificent 7 dipped 1.1%. In the UK, Rachel Reeves's budget confirmed £26 billion of tax rises, yet markets welcomed stronger-than-expected fiscal headroom. The Bank of England kept rates at 4% while inflation trends pointed to a possible December cut.

Fund objectives

The primary objective of this fund is to achieve a moderate level of capital growth. The fund is diversified across a range of asset classes with low-to-medium allocation to funds investing in equities and other risk assets.

Target Volatility: 4.6%-7.4%

Platform availability

This fund is widely available on third party platforms.
